

2020/2021

Since the pandemic is happening around the world in 2020 until now, as a progressive company, GeniusBrain Team started to develop Online Courses and Beta tested them with students.

After various R&D sessions for the course and with the additional 3D animation explainer, in January 2021, we launched the new version of Advanced Learning Strategies Online Course. Students who are not able to attend an actual class or would like to learn at home will benefit from the course.
